Technical services & Programming

Our technical team can adapt the solution, both at the equipment or at the software level, to meet all your requirements and needs.

Customized software adapted to your needs

The Pc Plus interactive kiosks are powered by a software specifically adapted to the client's needs. We adapt the functionalities depending on the client's objectives regarding the kiosk usage. To localize personal or services, to assist the sales process or for any other need, our software is efficient and easy to use.

Our kiosks can be linked on a local network or through internet.

PCP S-Line

This is the ideal terminal for public environment where security is an issue. Build in steel, its base can be anchor in any type of ground. It is extremely stable and its solidity is a good protection against vandalism. Furthermore, its 19 inches touch screen is very resistant against aggression while offering a clear and efficient interface.

This kiosk can be integrated on a local network or on internet. It comes with a 19 inches touch screen that resist aggressions. The PCP S-Line kiosk is delivered with brushed stainless steel or could be painted in the desired color.
